

Error Log Entry

What error message did you encounter (if any)?

I did not save my code, so when I tried to run the code, it presented me with past code

What unexpected behaviour did your program exhibit?

Both of my codes were not linking up together

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

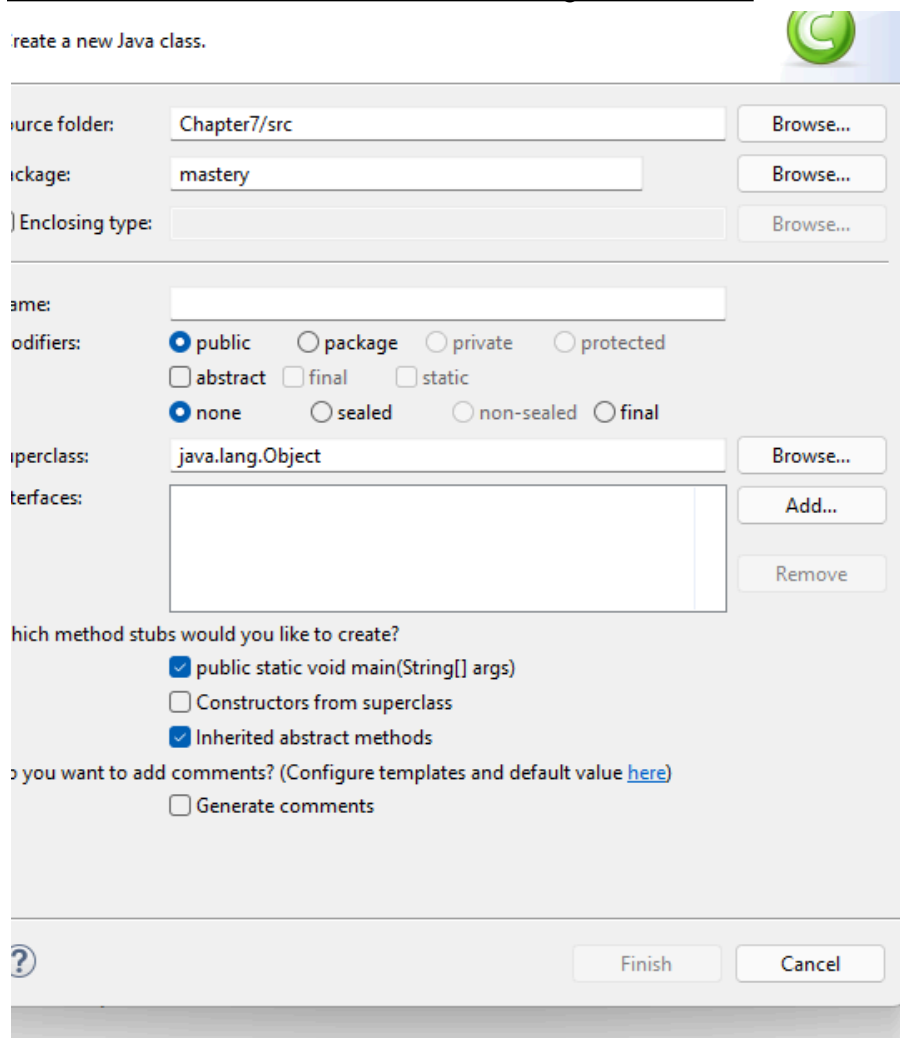

Include a screenshot of specific lines of code.

I do not have a picture

How did you fix the issue?

I deleted my class, and I made another class and I put that I would like a public static void in my second code.

Provide the corrected code or solution using a screenshot

Create a new Java class.
